Django Application Development

Project : User Registration Email Validation System

Developed and deployed with docker a Django-based application focused on user registration and email validation.

Integrated JavaScript for enhanced user experience and real-time validation.

Collaborated with a cross-functional team to ensure the application met project goals and deadlines

AI Model for Sign Language Recognition

Project : Flutter App Integration

Trained an AI model to recognize sign language gestures from images.

Integrated the model into a Flutter app, enabling real-time gesture recognition and user interaction.

Conducted extensive testing and optimization to improve model accuracy and performance
